Profile Summary

Flutter Developer and Software Engineer with over one year of industry experience developing and maintaining production mobile applications using Flutter and Dart. Experienced in Provider state management, REST API integration, Firebase Cloud Messaging, responsive UI development, debugging, and application deployment to the Google Play Store and Apple App Store. Skilled in collaborating with cross-functional teams to deliver maintainable, user-focused mobile solutions, with a strong passion for mobile application development and continuous learning.

Work Experience

Software Engineer

Jun 2025 - Present

Fintelext Pvt Ltd | Sri Lanka

- Develop and maintain production-ready, cross-platform mobile applications using Flutter and Dart, alongside responsive React-based web applications.
- Design user interfaces, and application flows in Figma, then translate approved designs into reusable and responsive frontend components.
- Integrate REST APIs, manage application state using Provider, implement form validation and error handling, and resolve frontend defects across mobile and web projects.
- Contributed to the release and deployment of Flutter applications on the Google Play Store and App Store.
- Implemented GitHub Actions deployment workflows to build application containers, publish images to Artifact Registry, and deploy services to Cloud Run.
- Collaborate with backend developers and project stakeholders in an Agile environment to translate functional requirements into maintainable, user-focused mobile and web features.

Projects

Yaya Agro - Production Mobile Application (Android & iOS)

Technologies: Flutter, Dart, Provider, Firebase Cloud Messaging, REST APIs, Azure CI/CD

- Contributed to a production agricultural advisory and marketplace mobile application with authentication, dashboard, content, and notification features.
- Developed reusable Flutter interfaces, integrated API-driven data flows, and supported reliable state and error handling across application modules.
- Contributed to the release and deployment of the application on both the Google Play Store and Apple App Store, including build preparation, testing, and deployment support.

Dima Events - Inventory and Order Management System (Freelance Project – Dima Events Pvt Ltd)

Technologies: React.js, JavaScript, Node.js, MySQL, REST APIs

- Developed and enhanced web-based inventory and order-management workflows for event-related stock and item movement.
- Implemented an external inventory flow to track items received from third-party companies, allocate partial quantities across multiple orders, and record returned quantities.
- Improved responsive popup and dialog layouts and introduced a dedicated external inventory section for clearer navigation and operational visibility.

Receipt Printing Android Application and Reps Management System (Freelance Project – Standard Industries Pvt Ltd)

Technologies: Flutter, Dart, Provider, Google Maps, React.js, Node.js, MySQL

- Built a mobile and web solution for recording receipt data, generating printable receipts, tracking representatives, and preparing operational reports.
- Implemented Google Maps-based representative location tracking through the mobile application and surfaced location data for administrative use.
- Integrated the Flutter application and React administration portal with Node.js REST APIs and a MySQL database.

Be Glamorous - AI-Powered Skincare Mobile Application (Final Year Research Project)

Technologies: Flutter, Dart, Provider, Python, Node.js, MySQL

- Developed a mobile application that analyses user-submitted selfies to provide personalized skincare recommendations.
- Implemented MVVM architecture with Provider and contributed social and community features for user interaction and skincare guidance.

Core Competencies

Mobile Development: Flutter, Dart, Provider, State Management, Android Studio, Responsive UI Design, Google Maps API, Firebase Cloud Messaging, Cross-Platform Development, Google Play Store Deployment, App Store Deployment

Frontend Development: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, UI/UX Implementation, Figma

Backend and Databases: Node.js, Express.js, Firebase, MySQL, RESTful API Development, API Integration, Database Design

Cloud and DevOps: Google Cloud Platform (GCP), Cloud Run, Cloud SQL, Artifact Registry, GitHub Actions, CI/CD Pipelines, Microsoft Azure, Azure CI/CD, Containerization, Application Deployment

Architecture and Practices: MVC (Model-View-Controller), MVVM (Model-View-ViewModel), Agile Methodology, Software Development Life Cycle (SDLC), Git-Based Version Control, Code Review

Project Management and Collaboration: Azure Boards, Sprint Planning, Task Tracking, Agile/Scrum, Cross-Functional Team Collaboration, Stakeholder Communication

Tools: Git, GitHub, Visual Studio Code (VS Code), IntelliJ IDEA, Figma, Postman

Education

BSc (Hons) Computer Science and Software Engineering

University of Bedfordshire, delivered through SLIIT City University | Graduated 2025

Graduate Higher Diploma in Software Engineering

SLIIT City University | 2021 - 2023
